Tough Luck Ends Coleman's Hopes in Provincial Play-Offs

After winning the Crow league championship, and gaining a two goal lead in the first of the play-off games here on Friday night in a thrilling game, Coleman lost to Blairmore by one goal on Monday night at Blairmore. Great hope had been built on the Canadians going on in the provincial play-offs, but Tony Vejpreva's wonderful scoring in Monday's game put Coleman's hopes to rest for this season.

Players and fans were greatly disappointed after having victory within their grasp, but such are the fortunes of league hockey. A lucky shot from Blairmore's blue line was the beginning of the jinx, followed by two more, all in the third period, giving Blairmore, with the goal scored on Friday night, four to Coleman's three.

COLEMAN HOMING SOCIETY ANNUAL MEETING

The annual meeting was held in the council chamber on Jan. 21. Officers elected were W. Pryde, president; Jean Claes, vice-president; A. Balloch, secretary.

The society will welcome fanciers wishing to join the club, the entrance fee being set at \$2.00.

ADANAC NOTES—THE PLAY'S THE THING!

After viewing the Coleman-Blairmore hockey match with both veneration and satisfaction, the Adanacs on Friday, Feb. 3rd, retired to the club hall to view a play, "The Catchable Bachelor." Mrs. Arthur Graham directed and the characters were very well taken. Scott McLintock played the title role, but was met and overwhelmed by polished, sophisticated Margaret MacDonald. Majorie Halliwell skilfully manoeuvred the plot with the unwitting aid of her genial, cocktail-shaking husband, Ken Blain, who beamed through the play, giving his very best sales talk. He almost got over a joke about to join the Wolf Cubs. Master Earle Bowen has just decided to become a cabin boy in Her Majesty's "Navic." Little Kenny Blain was proud of his title of "The nicest little chap in town." As usual the kiddies were somewhat rowdy, but thoroughly enjoyed themselves playing the customary games, not forgetting "Spin the Plate." Following this Scott McLintock touched everyone with his heart stirring rendering of the "Prisoner's Song." An operatic rendition by Arthur Graham was also heartily applauded. Little Izzy Atkinson, Maggie McDonald and wee Jimmy Cousins supplied the music while the members danced remarkably well, considering their ages.

We'll see you at the Valentine dance on February 10th—Con.

ADANACS

The Adanacs reversed the order of things on Friday, Jan. 27, when they held a "kid party." The little girls were arrayed in cute little creations of Crepe Suzette topped by huge hair ribbons. And the boys—Master Reggie Jones was exuberant over the fact that he is old enough to join the Wolf Cubs. Master Earle Bowen has just decided to become a cabin boy in Her Majesty's "Navic." Little Kenny Blain was proud of his title of "The nicest little chap in town." As usual the kiddies were somewhat rowdy, but thoroughly enjoyed themselves playing the customary games, not forgetting "Spin the Plate." Following this Scott McLintock touched everyone with his heart stirring rendering of the "Prisoner's Song." An operatic rendition by Arthur Graham was also heartily applauded. Little Izzy Atkinson, Maggie McDonald and wee Jimmy Cousins supplied the music while the members danced remarkably well, considering their ages.

We'll see you at the Valentine dance on February 10th—Con.

REV. ROY TAYLOR INTERESTS PEOPLE ON ROMANCE OF THE INDIAN

Experience of Missionary Work Vividly Portrayed in Costumes and Slides.

On Jan. 30 the United Church was filled to capacity to hear Mr. Taylor's lecture on "The Romance of the North American Indian." Eight years missionary work among the Indians of Manitoba and Alberta, close observation of the habits and the learning of their language, well qualifies Mr. Taylor in his graphic recital. Recitations from the beloved Pauline Johnson's works were given, and songs in the Indian language. All who were present were thrilled with interest in the portrayal of the Western Canadian Indians.

The proceeds were equally divided between the W.M.S. and the M. and M.

Local Welsh People Will Celebrate St. David's Day

Prizes Offered for Essays on St. David and for Best Welsh National Costume.

Coleman Welsh people have again re-organized. At a meeting held in the Knights of Pythias hall on January 22 the following officers were elected: Elias Jones, president; Mrs. W. J. Cousins, vice-president; Mrs. J. Richards, secretary-treasurer. It was decided to hold a concert, banquet and dance on St. David's Day, Wednesday, March 1.

Committees appointed: Banquet—Mrs. A. Brown, Mrs. J. H. Boulton, Mrs. J. Richards, Mrs. E. Jones, Mrs. G. Duffield Sr., Mrs. L. Richards. Entertainment—Messrs. A. Phillips, H. Chamberlain, Mrs. R. Evans. Working Committee—Messrs. J. Griffiths, J. Cousins, W. Cousins, J. Hadley, G. Hadley.

A prize for the best essay on St. David, consisting of 100 words, ages 12 to 14 years, and for those from 14 to 16 years, will be awarded. A prize for children of 16 years and over, will be awarded for the best entry representing the Welsh costume. All essays must be handed to the secretary, Mrs. J. Richards, not later than Feb. 24, and must be in sealed envelopes.

Custodian of Town Treasury is the Secretary-Treasurer

Councils may come and go, but Secretary James Ford stays on—well, not forever, but for twenty years he has seen successive councils and school trustees take office, and in his role as administrators of municipal affairs and pass on. Like the deputy ministers in provincial and federal governments, he has to advise and keep within the bounds of the statutes all and sundry who are elected to office. Should some over-optimistic advocate of public welfare wish to embark on an orgy of spending public funds, he must point out the reason why it can't be done, for, as a bonded servant of the ratepayers, he must of necessity safeguard the funds entrusted to his charge.

He must be impartial to all parties, a difficult role in a small community where everyone is called by their first name and familiarity is liable to cause people to expect things to be done which simply are not allowed. He must keep in check over all the business and public all get a square deal, in fact he is very much like "Poo-Bah" or the "Lord High Executioner" in the Mikado, except that he does not chop off heads.

It is his task to see that sufficient money is collected to pay running expenses of the town, the teachers' salaries and other charges. He is expected to be an encyclopedia of information on town and school affairs, and by December 31 of each year have his books in shape so that the auditor may walk in, check over all the business done, and give his O.K. if correct.

It is a position of responsibility with manifold duties attached which only years of experience can teach a man, and above all he must have the confidence of the ratepayers as a whole.

This Secretary Ford has to a high degree, and no matter who may constitute the new council or the new school board, his duties will proceed with the same unflinching adherence to duty to the ratepayers at large.

COUNCIL AND TRUSTEES NOMINATIONS

For Councillors, three to be elected: Walter Blyth, Sieve Danyluk, William L. Borrows, Alex. Holyk, W. Chapman, Andrew Harry.

For School Trustees, four to be elected: George Hope, Mrs. Alice Sudworth, Archie Fraser, D. J. Holley, Frank Barringham, Arthur Reid, William Antrobus, James M. Allan, George Evans, Harold Chamberlain.

William Lees nomination paper was not included, owing to his acceptance signature being omitted when handed to Returning Officer James Ford.

SOCIAL AFFAIRS IN HONOR OF BRIDE-ELECT

Mrs. Agnes Kellock has been the guest of honor at a number of social functions. On Jan. 27 the home of Mrs. A. M. Morrison was the scene of a delightful gathering, when nearly forty guests showered the bride-elect with many beautiful and useful presents. On Jan. 30 Dr. and Mrs. Borden were host and hostess to a party in honor of Miss Kellock, when a presentation of a handsome silver metal platter and two entire dishes was made.

Mrs. Albert F. Short also entertained in Miss Kellock's honor during the week, and on Thursday, Friday and Saturday afternoons Mrs. Kellock held trossau teas which were attended by a large number of ladies from the Pass towns.

The marriage of Miss Kellock, daughter of Mr. and Mrs. George Kellock, is to take place on Feb. 14th, at Noranda, Quebec, to Mr. John Charles Pratt, son of Mr. and Mrs. Charles Pratt, of Medicine Hat.

Mr. Pratt is engaged in mining engineering, and is a graduate of the University of Alberta. For a time he was employed under Dr. McKay in geological survey work in this district.

Miss Kellock completed her high school course here, and later studied at Mount Royal College, Calgary.

FEBRUARY BRIDE-ELECT SPOWDERED

On Friday, Jan. 27, the home of Mr. and Mrs. A. M. Morrison was the scene of a delightfully arranged shower, given in honor of Miss Agnes Kellock, a February bride-elect.

Softly glowing rose-shaded lights in the living rooms shone down upon a diminutive bride and groom, standing under a rose-petal and heart-hung canopy. Bowls of roses and snapdragons lent their note of harmony.

Between 30 and 40 guests brought many beautiful and useful gifts. Miss Kellock made a graceful little speech of acknowledgment, thanking her friends for their kindness and good wishes. The bride-to-be leaves shortly for Noranda, Que., where she will make her home.

The guests included Mrs. L. Lindoe, Mrs. McCullum of New Dayton, Miss M. McCallum, Mrs. J. A. McLeod, Mrs. Halliwell, Mrs. T. Flynn, Mrs. G. Pattinson, Mrs. H. C. McBurney, Mrs. A. McLeod, Mrs. R. Dunlop, Mrs. J. O. McDonald, Mrs. A. Dewar, Mrs. Florence Smith, Miss Anna Tuill, Mrs. R. P. Borden, Mrs. W. L. Rippon, Mrs. C. J. Devine, Mrs. J. Devine, Mrs. Barnes, Mrs. Price, Mrs. O. E. S. Whiteside, Mrs. A. E. Graham, Mrs. Maurice W. Cooke, Mrs. Albert F. Short, Mrs. George Kellock, Mrs. Kinross of Calgary, Mrs. G. Stevenson of Hillcrest, Mrs. P. Salt, Hillcrest, Mrs. J. B. Wilson of Blairmore, and the Misses Agnes Kellock, Dora Burrows, Margaret Price, Margaret Stevenson, Louise Jones, Eileen Jones.

Complimenting Miss Agnes Kellock, whose marriage to Mr. J. C. Pratt takes place in February, Dr. and Mrs. R. P. Borden entertained at dinner on Monday evening, Jan. 30. Covers were laid for fourteen guests. A pleasant feature of the evening was the presentation to Miss Kellock of a silver metal platter, and two silver entire dishes, which she acknowledged in her own charming manner.

The guests included Mr. and Mrs. G. Kellock and Miss Agnes Kellock, Mr. and Mrs. W. Stevenson and Miss Margaret Stevenson, Mr. and Mrs. J. W. Wilson of Blairmore, Dr. T. K. McLean, Mr. and Mrs. A. M. Morrison and Miss Ruth Morrison, Mr. and Mrs. Percy Salt of Hillcrest, and Miss Eileen Jones.

ENVELOPES—100 good quality printed with your name and address on flap or in corner, \$1.00. Box of 500 \$4.50.

Coleman Rinks Win Both Cups in Local Bouspiel

T. Jackson Wins Pontiac Trophy and J. Bell the Studebaker—Enjoyable Bouspiel.

Rinks skipped by the following took part in the two-day bouspiel on Feb. 1 and 2, when weather conditions were ideal.

Jackson, Boulton, Creagan, Ledieu, McLeod, Moore, McBurney, Rippon and Bell, Coleman; Salt, Hillcrest; Ritchie, Morgan, Carmichael, Blairmore; Truitt and Kerr, Bellevue.

In charge of Harold Reid as the deputy secretary in handling the draws, playing proceeded without a hitch, and finished on Thursday night with quite a gallery present to see Jackson win from Carmichael for the Pontiac Cup and accompanying prizes donated by the Coleman club, and Bell win from Kerr in the Studebaker cup with prizes donated by the Blairmore club.

Valentine Tea

The Ladies Auxiliary of St. Paul's United Church will hold Valentine Tea, Prizes and Parcel Sale, on Saturday, Feb. 11th, from 3 to 6 p.m. Everybody welcome.

Notice of Poll

Town of Coleman and Coleman School District No. 1216 Municipal Elections

Public Notice is hereby given that an election will be held for the office of councillors and for the office of school trustees of the Town of Coleman and Coleman School District No. 1216, for the years 1933 and 1934, and that the polling will take place on MONDAY, February 13, from 10 o'clock in the forenoon until 6 o'clock in the afternoon at the Town Hall, and that I will at the Town Hall on the 13th day of February, 1933, at 8 o'clock in the evening, sum up the votes and declare the result of the election.

Given under my hand at Coleman this 5th day of February, 1933.

JAMES FORD, Returning Officer.

Ladies and Gentlemen:—

Your Vote is Solicited by WILLIAM ANTROBUS

Independent Candidate for re-election as School Trustee.

Being independent, I can consider all business coming before the board on its merits, and without interference or dictation from any source.

Government officials tell us that our schools and staff are the equal of any in the province. We have more teachers graded "Excellent" than the combined schools in the Crow Nest Pass. We should be proud of our schools and not permit politics to interfere with their management.

During the past year the Board provided free scribes, pencils, erasers, etc., to the cost of nearly \$1,000, and this was accomplished without any increase of taxes.

I am wholeheartedly in favor of this policy being continued. Beware of the candidate who would reverse this policy. I look on a child at school as a bundle of possibilities for good or ill, and if elected will give my best endeavors to keep strong our line of the eternal triangle—public school, church, home—that produces good citizens.

A vote for William Antrobus can be considered a vote for Independent, Efficient and Economical School Management.

Citizens League Urges Solid Support for Candidates in Municipal Elections

Following Manifesto States Reasons Why Ratepayers Should Vote the League Ticket

(Published by League Executive)

To the Ratepayers of Coleman:

The Citizens League urges your support and influence for the following:

For Council:

WILLIAM L. BORROWS, Timekeeper,
WILLIAM CHAPMAN, Miner,
ANDREW HARRY, Miner.

For School Trustees:

JAS. M. ALLAN, Merchant,
GEORGE EVANS, Miner,
GEORGE HOPE, Engineer,
ARTHUR REID, Master Mechanic.

The reasons we do so are:

FIRST: That in the interests of the ratepayers as a whole, those who bear the cost of taxation, men should be elected to office whose policy on council and school affairs is clearly defined and who have openly declared themselves as standing for the maintenance of our laws and the promotion of the ideals of Canadian citizenship.

SECOND: That because of the efforts that have been and are being made to lessen that respect for law and authority which are prejudicial to the common good, the Citizens League decided that it would support solidly as a slate the above candidates, whose motives for good municipal administration they have every confidence in.

THIRDLY: That in trying times such as experienced during the last three years and which have caused deep thinking among people, it is imperative that men whose records show constructive ability instead of trying to tear down our systems of government should receive the support of the ratepayers in this election.

ELECTION DAY is the only day when you can make your opinion of definite value in electing these candidates. In the meantime you can use your good influence among your friends. The Citizens League solicits the support of every ratepayer and voter who is desirous of municipal government which will be answerable to the citizens, and not dictated to by agents of outside influences whose aim is not to build up but to destroy those institutions which we as citizens take pride in.

VOTE SOLIDLY FOR THE ABOVE SLATE—URGE YOUR FRIENDS TO DO LIKEWISE.

COLEMAN CITIZENS LEAGUE EXECUTIVE

A. M. Morrison, president; George Pattinson, R. F. Barnes, H. C. McBurney, E. W. Beart, David Gillespie, James Anderson, Andrew Harry, William Lees, H. T. Halliwell, Secretary.

UNITED CHURCH NOTES

The usual services will be held in the United Church on Sunday, Feb. 12, with the minister in charge of the services morning and evening. In the morning the Junior choir will lead the singing and Mr. Taylor will preach on "The Place of Vision."

In the evening the senior choir will lead the singing and the minister will continue his series of sermons on the "Way Into The Kingdom," taking as his theme the second Beatitude "Blessed are the meek."

These sermons are intended to be of help to all.

Let us not forget our privilege of sharing in the services of the Sanctuary. One day a week ought to be little enough for us to give to God. We need the help and inspiration of the Church in these stressful days. "I was glad when they said, Let us go up into the House of the Lord." Strangers and visitors will be made welcome.

Choir leaders: Miss Margaret McDonald, Mr. J. Cousins, Mr. J. Emmerson. Minister, Rev. Roy O. Taylor, B.A.R.D. The minister is attending the Lethbridge Presbytery at Lethbridge.

ST. ALBAN'S CHURCH NOTES

Next Sunday is Septuagesima, the services will be: 11:15 a.m. Holy Communion, 12:30 p.m. Sunday School.

IMPORTANT TO REMEMBER

It is important to remember that in marking ballots for the municipal elections, three names only must be marked with an X opposite the names voted for. For the school trustees four must be voted for. If more or less are voted for, it makes the ballot of no use. Ballots must not be marked with figures. Some have the impression that the names should be marked 1, 2, 3, 4 in the order voted for. This will spoil the ballot.

THERE MUST BE PROFIT

There can be no prosperity without profit. To preserve a service enters into a product, whether it be production, transportation or distribution—each service must be rewarded. Because it is the earnings of today which go to build the progress of tomorrow. And where there are no earnings there can be no progress—nor can there be prosperity. It is better to sell 500 articles at a profit, than 2000 articles at a loss.—Wisconsin Press Bulletin.

36 below zero on Wednesday morning was the record low temperature of the season. The cold wave was general throughout the west.

Proved purity and quality upon which no imitation can possibly improve. For 80 years the favorite arrowroot biscuits in Canadian homes.

Christie's PURE Arrowroot Biscuits

Tabulating The Census.

In this machine age, and during a period of unemployment on a scale never before experienced, there is a tendency in some quarters to lay the chief blame for the prevailing unemployment to one factor—the machine. It is being argued that man through his great inventive genius has succeeded so well that he is putting himself out of work; that the machine is now doing what man himself ought to do. It cannot be denied that the machine has displayed man-power in many directions and ways. But, conversely, it cannot be denied that the machine has developed so many new things and made them accessible to masses of the people who would otherwise be denied them that, in other directions and ways, the machine has created employment for man. Many examples of this might be given.

Aside from this, however, there is another factor that is too often overlooked, and that is, hundreds of things are now being made and done by machinery which would never be done at all if we had to depend upon man-power to do them. They would be economically impossible, and but for the machine, man would simply be denied these things which the machines now do or provide for him. In such instances the machine is not depriving man of employment, but is merely adding to the sum total of the world's goods, services, conveniences, even knowledge.

Let us devote this article to a concrete illustration of this fact, gleaned from the most interesting newspaper article. Can you imagine a machine that counts 240 separate facts at the same time? Can you imagine a machine that detects man-made mistakes? Yet the inventive genius of a Canadian has evolved such machines which are now at work in the Census Bureau at Ottawa, machines which do anything in the world. They are not replacing men and women, because as many, or more, persons are employed in the Census Bureau as in former years, but they are making thousands of calculations now possible which otherwise would never be made.

The 1931 census of Canada, now being tabulated in the biggest job of its kind ever undertaken in this country. Were it not for the two machines referred to it would cost three times as much as it will to tabulate the information which will be published, and it would, therefore, never be undertaken. In addition, on much more information will be compiled than will be published, but it will be available if and when required.

The two machines, a verifier and the tabulator. The first detects errors and the second counts 240 different facts from individual cards at the rate of 240 cards a minute.

The data taken by census enumerators is transferred to small cards by punching holes for each fact recorded. A hole is punched in the proper place to indicate the sex, age, religion, nationality, language, race, origin, and other things of the person being counted. This card is then sent to the machine, certifying machine to check possible errors. The machine throws out cards on which conflicting pieces of information are recorded. For instance, if a person's age is 25 and he is listed by mistake as a non-voter, under 21, the card is thrown into the discard by the machine and sent back for checking to correct the discrepancy.

If a man gives his racial origin as Jewish and his religion as Baptist the card is thrown out and re-checked. If the sex is omitted the card is shot back. The machine, of course, cannot detect a straight error in a single fact, such as the wrong age, or the wrong sex, but it can and does detect all discrepancies of conflicting data.

The tabulator is the only machine in the world which will count 240 separate facts at the same time, and, as already stated, it does it at the rate of 240 cards a minute.

Just how these two uncanny, almost human, machines do their work will not permit of a description, intensely interesting as it would be. They were invented by A. E. Thornton, machine oil superintendent of the Dominion Bureau of Statistics, and were built in Ottawa under his direction and that of his assistant, F. Bell. These two men worked for three years on their plans. They had some little difficulty persuading the Government to allow them to build the machines as commercial manufacturers secured and said they would never work. The machines have been working for 15 months without a hitch.

The next latest machine in the world is at Washington and is used by the United States Census Bureau. It, however, tabulates only 60 facts at a time compared with the 240 tabulated by the Canadian machine. The largest commercial machine in the world tabulates only 38 facts and cannot be bought. It can only be rented. Before the next U.S. census is taken, Mr. Thornton's machine will likely be in operation at Washington. Canada is miles ahead of the United States in this respect.

Development of the machine was an exemplification of the theory of necessity being the mother of invention. Had Mr. Thornton and Mr. Bell not set to work in their little machine shop it would most likely never have been invented. Private companies would scarcely devote time and expense because there is little market. The machine is of use only for census purposes and the Dominion Government is the only customer in Canada.

But to emphasize the idea mentioned at the outset of this article. Let it be repeated that these machines are not throwing people out of jobs. The tabulation of the present census will not cost less than previous ones and as many or more people are employed. What the machine does is enable the Bureau to do much more work, to tabulate much more information than ever before, and which, without the machines, never would be tabulated.

So much information will be tabulated, that it is stated, if it were all published the volume would fill the Parliament Buildings at Ottawa and the printing costs would approach the operating costs of the Canadian National Railways. By careful selection the Bureau will decide what will be published, what figures will be of greater use to the public, and what will be of no use at all, and because all this information, carefully tabulated, will be available to them.

Her Heart Was Weak Nerves Shaky, Nights Restless

Mrs. A. Black, Wallaenburg, Ont., writes:— "I suffered from heart weakness, shaky nerves, and restless nights."

I saw your advertisement for Milburn's Heart and Nerve Pills and decided to try them although I did not have much faith, but now I am very thankful I did as they have proved of wonderful help to me.

I am now strong and well again, but am never without a box in the house."

The sale at all drug and general stores; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

New Tire Guarantee Announced

New Warranty Hoped To Result In More Satisfactory Results. Much of the confusion incidental to tire adjustment claims will be eliminated by a new guarantee announced by all standard-line tire manufacturers. Tire companies believe that no longer will car owners find themselves in dispute with dealers and manufacturers as to the validity of their claims.

The new guarantee, planned to remove all contentions, possibilities, warrants tire used in private passenger car service for 3 months or 12 months, depending on the type of tire, and a guarantee certificate accompanies each tire.

All road hazards, excepting punctures and wearing flat, are covered by the new guarantee and provision is made for a satisfactory repair or a new tire adjustment based on the terms of the guarantee. It will be seen that, under this new warranty, allowance will be made for such injuries as stone-bruises, cuts, wheels out of line faulty-brakes, etc., not previously covered by the guarantee. This is a new and definite advantage to the tire user.

Dealers are now selling tires under the new guarantee and motorists are warned that a certificate should be obtained with each new tire. The new guarantee covers, also, tires sold as equipment on new passenger cars to be used in private service.

Leading tire manufacturers believe the new warranty will result in more satisfactory automobile service through the elimination of disputes and the broadened coverage of the warranty.

Special Garnet Grades Asked

Committee Would Like Legislation To Become Effective In 1934

Three special grades will be set up for Garnet wheat if the recommendations of the Western Grain Standards committee are accepted by the Federal Government. Hon. R. S. Dundas, assistant grain commissioner for Saskatchewan, announced on his return to Saskatoon from a meeting of the committee at Winnipeg. The committee will ask the government to pass the necessary legislation, an amendment to the Grain Act, at the coming session, but will advise that it should not become effective before the arrival of the 1934 crop.

The committee would, however, leave it to the Board of Grain Commissioners to bring the new grades, No. 1 C.W. Garnet, No. 2 C.W. Garnet, and No. 3 C.W. Garnet into effect any time prior to the harvesting of the 1934 crop if deemed desirable.

It was pointed out, Mr. Dundas added, that the possible large carry-over at the end of the 1933 crop year would contain a large proportion of Garnet wheat which would be disqualified as No. 2 Northern if the new grading had come into effect. This influenced the committee in advising that the new grading should not become immediately effective. Also the committee did not want to upset the grading system at present for fear of an adverse effect on the present low price of wheat.

Not Enough To Go Round

Farmers Keen On Getting Pure Bred Breeding Stock

Reports received by A. A. MacMillan, Chief of the Sheep and Swine Division of the Dominion Department of Agriculture, show that Saskatchewan breeders, like hog breeders all over Canada, are particularly keen on getting pure bred breeding stock. All the pure bred sows from the Industrial Farm at Moose Jaw were purchased on the account of the Federal Department for distribution under the Brood Sow policy. And while this looked like a large order to dispose of, demand was so keen for this high quality stock that it literally sold itself; and, as a matter of fact, it has been quite impossible to service the large number of enquiries for pure bred gilts which this sale attracted.

Communists Obje

The Kiwanis Club of Timmins, Ont., has undertaken a campaign to secure a day's pay from every employed person to assist those in need. According to the Porcupine Advance, it is meeting with general success. But it is meeting with opposition from the Communist element which has issued a circular pouring abuse on those promoting the plan. Toronto Globe.

Building cement is sifted through such fine screens that it is possible to hold water in them.

According to the 1930 census South Carolina has the highest percentage of illiteracy.

How Soviet Russia Trades

Demands Cash From Others But Unlimited Credit For Itself

How the barter scheme with Soviet Russia would work out we will very likely not be allowed to know, because the Canadian Government is asked to guarantee \$4,000,000, but in the case of a real trade agreement we get some idea. Italy has a trading pact drawn up in 1924, which expires next August, and the Italian Government has apparently had enough of it as notice is expected to be given within the next few weeks to terminate it. Not only has the trade been very one-sided, but while the Soviet demands cash for Italian purchases, it demanded four years and four months of it for itself. Now the Soviet has put forward feelers for longer credit. That might be five years, six years, seven, or how long will you give.

Such as nations want trade, five years or more credit compared with cash "is a bit too thick."—St. Thomas Times-Journal.

Canadian Seeds Exchanged

Canadian Wild Flower Seeds For Planting On War Graves In Europe

A report issued by the Division of Botany of the Dominion Experiment Station at Farm Branch shows that the annual exchange list of seeds, collected in the above-named countries, some 1,557 species, and a total of 4,892 packets of seeds, 150 rooted plants and 11 cuttings were sent out to 110 botanical gardens or other botanical institutions, throughout the world. In return, 21,171 packets of seeds and 21 rooted plants were received from foreign gardens. Special supplies were obtained, as required, for scientific workers in Canada. Twenty-eight packets of seed of Canadian wild flowers were sent to the War Graves Committee for planting on the battlefields of Europe. Other activities included studies of the life history of noxious weeds, and of chemical methods of eradication.

Studio At Coast

British Films To Be Produced In British Columbia

A studio for production of British moving pictures will be established in British Columbia. It was announced by Major C. Fairbanks Smith, former British army officer who has superintended construction of large studios in Hollywood. The announcement follows the incorporation of the British-American Film Company at Victoria.

The studios will be rented to various Hollywood producers who desire to continue in the British market under the Empire Quota laws. In addition the company will make at least eight productions of its own each year under the direction of Edward Carewe, who has been engaged by the company, Major Smith added.

The company will be under British control as the British quota law specifies while the staff and actors will be 75 per cent. British.

Shows Star Movements

Young Amateur Astronomers Builds "Stararium" In St. Louis

A miniature planetarium which is said to unfold the drama of the firmament in much the same manner as does the \$1,000,000 Alder planetarium in Chicago has been built at St. Louis, Montana, by Stuart O'Byrne, 27-year-old amateur astronomer. O'Byrne calls his model a "stararium," since, he says, it shows only star movement, while a true planetarium, of which there are only two in the United States, will show the movements of the stars, planets, sun and moon in their proper position in relation to the time of the year and the latitude from which observed.

It takes thirty-five men about three months to paint the dome of the Capitol at Washington, and 4,300 pounds of paint are mixed for the task.

Over 55,000 pounds of herring scales have been sold by fishermen of New Brunswick to manufacturers of artificial pearls.

CHEST COLDS Best treated externally

2 WAYS at once!

Mother! The night coughs of children can usually be relieved by one application of Vicks. Just rub on freely and cover with warm flannel.

When a cold goes down into the chest, take no chances. Go to bed and start Vicks double-action treatment.

Rub Vicks vigorously over throat and chest and cover with warm flannel. Relief is two-fold:

(1) Stimulation—Through the skin like a plaster Vicks "draws out" tightness and soreness.

(2) By inhalation—Its medicated vapours released by the heat of the body are inhaled direct to the air-passages.

To increase the stimulative effect, reddens the skin over throat and chest with hot wet towels before applying Vicks.

VICKS VAPORUB

OVER 26 MILLION JARS USED YEARLY

Forage Crop Distribution

Policy Instituted Last Year Is To Be Continued

The forage crop distribution policy instituted last year by the federal minister of agriculture, the Honorable Robert Weir, is to be continued in 1933. This policy was designed to encourage and stimulate the production of seed grasses and clover in order that more feed of good quality may be available for livestock and thus develop permanency in agriculture, in the areas where it is possible to do so.

There has been named a provincial committee to handle this work, composed of T. M. Stevenson, agronomist, forage crop laboratory, Saskatoon, who is responsible for supplying information on varieties, methods of growing and other technical data; S. H. Vigor, chief crop commissioner, provincial department of agriculture, Regina, who is responsible for the selection of growers, and will, therefore, receive all applications from farmers wishing to participate in the distribution, and Nelson Young, district inspector, Dominion seed branch, Saskatoon, who will purchase and distribute the seed and also be responsible for the collection of same.

Selected lots of brome, western sweet clover and alfalfa will be distributed. Any farmer may apply for one kind of seed grass or clover, where the maximum acreage is 25 per acre. In the case of alfalfa, seed for 10 acres can be secured, and consideration may be given an application for alfalfa and another grass. The total acreage, should this be allowed, would be 25, that is a grower may get alfalfa for 10 acres and brome for 15.

Applicants must agree to return pound for pound of seed of equal grade from the first satisfactory seed crop, or pay in cash one-half the cost of the seed delivered within two years. The return of seed or payment will be made to the Dominion seed branch.

Apparatus For Deaf

A perfected apparatus, which will enable the deaf and dumb to hear—and so learn to speak—was demonstrated in the office of Hon. J. D. Monteith, Ontario Minister of Public Works, under whose directions it was constructed. It is developed on the principle of sound amplification and the cost is a mere fraction of "hearing" machines now in use.

Made Old Cars Drive

By making the old driver last another year Canadians got along with 27,514 fewer automobiles in 1932 than in 1931, according to statistics in the automobile industry, compiled by the Dominion Bureau of Statistics. The apparent consumption of new automobiles in Canada during the year was 49,244, while 76,758 were bought in 1931.

A passenger on a railroad runs only one chance in 37,500,000 of getting killed, statisticians announce. And while the chance of getting a cinder in the eye?

More than 56 out of every 100 women in Latvia are engaged in gainful occupations.

Husky Turns Thief

Took Heavy Blanket From Clothes Line At The Pas

A lone husky, full of energy and craving action, stepped out at The Pas the other night and before he was finished landed in the clutches of the law.

The pooch apparently stepped into the middle of Fischer Ave., looked up and down, and came to the conclusion The Pas was dead.

Then he sighted a heavy blanket hanging from a clothes line. He dug his teeth into it and started down the street, the blanket trailing behind, hoping maybe to meet other huskies to start a tug of war.

He stepped into one of the main streets to issue his challenge and ran right into the law. That finished it. Police spoke and he gave up his plunder.

Only One Answer

Japan's Threat To Leave League Should Be Ignored

There is only one appropriate answer to Japan's threat to leave the League if the resolution censuring her proceedings at Manchuria is not withdrawn; and that is to ignore it entirely. Between a League of Nations which has bought the support of Japan by a supine acquiescence in her violations, and a League of Nations which is temporarily deprived of her support for refusing to do so, there cannot be a moment's hesitation.—London News-Chronicle.

To Improve Wheat Prices

Best and Most Effective Way Is To Reduce Acreage

We have led the world in increasing wheat acreage following the disappearance of Russia and the Balkan countries from the war's of the exporters. There is every reason why we should now set the example of reducing acreage. All the world wheat conferences which could be held, all the legislation which could be sought, would not be so effective in the direction of improving wheat prices as this one step.—Winnipeg Tribune.

Continuation of the drought in the high-belt grazing regions is threatening South Africa's livestock this season.

The "tourist" industry has fallen to half million mark in France, as compared to 3,000,000 foreign visitors a year before the World War.

GIN PILLS

FOR THE KIDNEYS

THE WORLD'S BEST REMEDY FOR ALL KIDNEY AND BLADDER TROUBLES

Northern Flyers Are Killed In Crash Near Fort Rae

Fort McMurray, Alberta.—Victims of the far northern air trials, two pioneers of the Arctic rim lay dead tonight in the desolate stretch of husky-swept country near Fort Rae, North West Territories.

Meagre news reaching here today carried word of a search plane of the Canadian Airways, Limited, found the bodies of Pilot P. B. Calder and his engineer, A. W. Nadin, missing since January 31, after leaving Fort Rae. Reports of the death of the flyer and his engineer were rushed to western headquarters of the Canadian Airways at Winnipeg and to the northern Alberta base at Edmonton.

Details of the crash are lacking, but it is believed the search plane dived to the snow-covered frozen ground a few hours after leaving the North West Territories base. The search plane found the wrecked machine. Nearby lay the two bodies, frozen. It was indicated both Calder and Nadin had been pitched to their deaths.

Flying mates in the north for the past few years, both Calder and Nadin were known to airmen throughout the Dominion and both were participants in many a northland adventure. Calder's rating as a pilot was among the highest in Canada.

Like many another flyer on mail and passenger runs in western Canada, "Paddy" Calder received his flying training with the Royal Air Force. He was flying in a fighting machine in France while in his teens, and the short and stumpy pilot came through with flying colors.

Immigration Decrease

Few Arrivals From Britain and European Countries

Ottawa, Ont.—The decrease in immigration to Canada from the United Kingdom and European countries is indicated in figures tabled in the House of Commons by Hon. W. A. Gordon, acting minister of immigration.

During the first six months of the present fiscal year only 174 agricultural laborers entered Canada from the British Isles, including the Irish Free State. During the fiscal year 1929-30 the figure for this immigration was 13,257, in 1930-31 it had dropped to 4,557, and last year to 551.

From European countries, agricultural laborers entered Canada during the first half of the present year to the number of 65, only 50 in the fiscal year 1931-32, and 12,118 in the preceding year.

Total immigration, excluding farm laborers, from the British Isles during the first half of the present fiscal year, 5,125 came in, and 15,411 in 1930-31. From European countries, 1,453 came in during the half year, while in the fiscal year 1931-32 the total number was 2,877. In 1930-31 it was 18,962.

Amy Johnson Given Award

Woman Aviator Receives Segrave Memorial Trophy

London, England.—Amy Johnson, Mollison, England's premiere woman aviator, was notified that she had been awarded the Segrave Memorial Trophy, established in 1930 after the death of Sir Henry Segrave, the motorboat racer.

The two previous winners were Bert Hinkler, who has been missing for weeks on a solo flight from here to Australia, and Sir Charles Kingsford-Smith.

The Washington Debts Parley Hoped To Create Friendly Atmosphere

London, England.—Great Britain's fundamental aim in entering the Washington debts discussion will be to create a friendly atmosphere and a mutual trust leading to a widespread American understanding of the world nature of the problem which, in the British view, calls for a rapid final settlement by a drastic scaling down.

This is the view of authoritative opinion, of highest government quarters, and with the cabinet strongly united on the war debts policy, plans will be rapidly completed for the

Western Estimates

Sums Set Aside For Public Works In Western Provinces

Ottawa, Ont.—Western estimates: tabled in the House of Commons include sums for public buildings in western Canada, and also for harbor and river improvements, particularly on the Pacific coast. Under the head of "public buildings, the following appropriations for the fiscal year 1933-34 are made:

Dominion public buildings: Improvements and repairs, \$25,000; Regina armory payment on installment of purchase of armory, \$31,000. Saskatchewan: Old post office building—alterations and improvements, \$4,500.

Total, \$60,500.

Under the heading of "harbors and rivers," the following appropriations are included:

Saskatchewan, Alberta and North West Territories: Harbors and rivers generally for maintenance of services; no new works to be undertaken, \$15,000.

Provision is made for certain telegraph and telephone lines, as follows:

Saskatchewan and Alberta: Saskatchewan and Alberta telegraph and telephone lines: Repairs and improvements, \$7,700.

Sees Gradual Recovery

Walter Runciman Says Canada Feeling Effects Of Depression In United States

St. Ives, Cornwall, England.—Walter Runciman, president of the Board of Trade, told an audience here that Canada was feeling effects of the business depression in the United States and that until prosperity returned to the United States the Dominion could not prosper.

Success of the Canada-United Kingdom trade agreement signed at the Ottawa conference last summer, Mr. Runciman said, depended on the operation of the Canadian tariff board. "If it is a good board, impartial and broadminded, and shows insight, undoubtedly they can within their own limits add a good deal to Anglo-Canadian trade," he declared.

"Our own tariff committee is absolutely free from all political influence. We only ask that the Canadian committee should be similarly free."

He said he anticipated a gradual return of prosperity to the United Kingdom.

Railway Amalgamation

Liberal Members and Senators To Oppose Move In This Direction

Ottawa, Ont.—Liberal members and senators will oppose amalgamation of the Canadian National and Canadian Pacific Railways, it was decided at party caucus.

In addition to opposing amalgamation of the railways, the party went on record as favoring the maintenance of the integrity of the Canadian National.

It was understood individual members expressed the view that if amalgamation was to be entertained at all, it should be that of the two railways under government, rather than private ownership.

The decision of the caucus will influence the progress of the government's railway legislation through both Houses of Parliament. Senators, as well as members of the Commons were present and very probably will reflect the "no amalgamation" policy during the debate on railway legislation in the Upper House.

Making New Peace Proposals

Japan Willing To Withdraw Certain Objections To Manchurian Settlement

Tokyo, Japan.—An official spokesman indicated that Japan has withdrawn certain objections to the League of Nations formula for non-recognition of the Manchurian dispute, and would make new proposals for a settlement on that basis.

He indicated the delegates were authorized to concede other points blocking conciliation under paragraph three of article 15 of the League Covenant, if the League drops its intention to enunciate non-recognition of the government of Manchukuo in Manchuria and further limits the competence of the proposed conciliation committee.

A Japanese foreign office spokesman said:

"We are not hopeful that the league will accept our terms. If they are refused, application of paragraph four is inevitable. The nature of the report under that paragraph will determine whether Japan will withdraw from the league."

War Debts

Britain's Stand For Settling War Debts Without Swapping

London, England.—Britain's clear-cut stand for settling the war debts without "swapping" economic concessions with the United States, or pledging return to the gold standard except on definite conditions, was outlined with outspoken frankness by Chancellor of the Exchequer Neville Chamberlain, the guest of the American Correspondents' Association of London.

Mr. Chamberlain told the writers he did not come to make a speech on war debts, and his talk dealt in the main with an analysis of the world economic depression, the solution of which, he said, was largely dependent on the return of confidence everywhere.

'The Queen's Husband'

Maurice Colbourne and Barry Jones To Appear in London Comedy Hit

What is most certain to be the theatrical event of the present season, just as it has proven to be the highlight throughout Canada, is the coming engagement of Maurice Colbourne and Barry Jones in their record-breaking London comedy hit, "The Queen's Husband" at the Hub Theatre, Saskatoon, Feb. 8-9; Darke Hall, Regina, Feb. 10-11; Technical Theatre, Moose Jaw, Feb. 13.

Local publicity will recall the sensation that these young actor-managers created when last season in the midst of a successful run at the Ambassadors Theatre, London, England, they decided to come to Canada, visiting Toronto, Montreal, Hamilton, and Ottawa, which cities showed their appreciation by crowding the theatre to absolute capacity. After the brief Canadian visit, Messrs. Colbourne and Jones returned to London, England, where they remained for many more weeks.

Being unable to visit here last season, those popular British stars are now, in response to requests from their many London friends, bringing the same company and production, thus affording lovers of the theatre an opportunity to witness the London success exactly as presented in the British Metropolis.

TECHNOCRACY'S DUCE

The elusive Howard Scott, High Priest of Technocracy, at last run to earth by the camera, is shown here as he announced that he would continue his work for technocracy despite the withdrawal of Professor Walter Rautenstrauch, his right hand man, and other associates doing research work at Columbia University. The deserters from the Scott banner will carry on under a new name, leaving "Technocracy" to Scott.

Resents Attacks

Miss Agnes McPhail Objects To Criticism Of C.C.F. Movement

Ottawa.—Recent attacks on "securitist attacks" directed by speakers and in the press against leaders of the Co-Operative Commonwealth Federation movement were expressed by Miss Agnes McPhail (U.F.O., Grey South East) in the House of Commons recently. Their only effect, however, had been to assist the movement. She thanked the prime minister and the Conservatives particularly for their assistance. Had it not been for government announcements from time to time far fewer people would have turned out to C.C.F. meetings.

While the organization derived its first support from farmer and labor groups, Miss McPhail said, its ranks were being steadily augmented by business and professional men. These people were no longer secure in their livelihood and many of them were among the unemployed.

Open Season For Beaver

Trapping In Northern Saskatchewan Legal During March and April

Regina, Sask.—Open season for the trapping of beaver in the northern area of the province north of 55 has been declared for the months of March and April, according to an order-in-council passed recently.

The catch is limited to 10 beaver per trapper and no trapping is permitted south of 56.

This new order-in-council rescinds one passed some time ago providing for a closed season for beaver over the entire province until December 31, 1934.

President Of Land Surveyors

Ottawa, Ont.—C. H. Taggart, Ottawa, was elected president of the association of Dominion Land Surveyors at the 26th annual meeting February 2. The last surveyors have been holding a two-day convention here.

AIR MINISTER ON TOUR OF INSPECTION

Here we see Lord Londonderry, British Secretary of State for Air, leaving Croydon by the huge air-liner "Heracles" to make a tour of the Royal Air Force units in Egypt, Palestine and Iraq. It's a long trip and perhaps a bumpy one, but the "air-minded" Air Minister seems quite happy.

Adolf Hitler's Forces Are Expected To Win Next German Election

Veterans Given Clean Sheet

Committee Investigating Alleged Pension Frauds Submit Report

Ottawa, Ont.—What amounts to a clean sheet was given Canadian veterans by the joint committee which investigated administration of the Pension Act in connection with alleged pension frauds. "While it is impossible not to have some violations in the expenditure of nearly \$60,000,000 a year, nevertheless investigations had shown that in most cases the frauds were not committed by the men who had served," the committee reported.

Brigadier-General Alex. Ross, C.M.G., Dominion vice-president of the Canadian Legion and a vice-chairman of the joint committee, has this to say in his report: "tabled in the House of Commons recently:

"Some of them are not really frauds at all, but innocent errors or mistakes. There are, however, a number of cases of detected fraud, but the majority of them are not in respect of pension entitlement, but in respect of dependent pensions."

"Some of the larger frauds are in respect to widows properly pensioned at the outset, but who have concealed the fact they have re-married and by perjury have received money to which they are not entitled."

"Others represent men who are separated from their legal wives and have claimed in respect of a woman to whom they are not married. There is also the type of case where a man has believed himself legally married, only to discover that the woman has already married and not divorced."

Must Observe Ottawa Pacts

Britain's Hands Tied United States Newspaper Men Informed

London, England.—Great Britain does not look upon the approaching debt conference at Washington as a "great swamping deal," Neville Chamberlain, Chancellor of the Exchequer, declared at a luncheon of U.S. newspaper correspondents.

The agreements achieved at the Imperial Conference in Ottawa last summer "cannot be torn up," he said, and the British Government's hands are tied by those agreements so far as they affect any arrangements with the United States.

Neither can Britain "contemplate with equanimity return to the gold standard until we are certain that it will work better than it did just before we left it," he said.

"Great Britain believes in a stable international standard of value. But there are many conditions to be fulfilled before she returns to gold."

He enumerated some of those conditions: First, settlement of the war debts problem; second, lowering of trade barriers; third, modification of the maldistribution of gold, and fourth, settlement of disturbing world political problems or progress toward their solution.

Committee Of Senate Votes Against Railway Amalgamation Plan

Ottawa, Ont.—By a vote, 24 to 1, which, despite its designation as "unification" he declared meant amalgamation.

Quite clearly he carried a dozen or more of his colleagues with him and in the brief debate which preceded the vote those who have been befriending railway unification displayed a remarkable tendency to take cover, to qualify earlier remarks.

The overwhelming majority against amalgamation or unification was somewhat deceptive since only 23 committee men were present out of a total of 49 and among the 24 absentees were most of the supporters of railway fusion. Nevertheless it is well known that at least five or six of the absentees are supporters of the present bill which makes it clear that any later efforts in the committee to rescind today's decision will be nullified.

Events in the committee proceeded at breakneck pace. Led by Rt. Hon. Arthur Meighen, the supporters of the Duff legislation demanded a show down on the amalgamation issue. Mr. Meighen threw the full weight of his influence against the Beatty plan,

Berlin, Germany.—If the next re-chaiting election brings the 51 per cent majority which Adolf Hitler's Nazis confidently expect, the Nazi storm troop leaders will head the police forces in countless German cities, a close adviser to the chancellor said today.

Beginning with Berlin, where Count Wolf Helldorf von Helldorf, leader of the Berlin storm troops, is slated for chief of police, and continuing into the smallest towns, the Nazis expect to take the places of anti-Nazis.

"The street now belongs to us," the Hitler spokesman said. "Hereafter our demonstrations will not be held under police protection instead of combating police chaos."

With our men heading the police everywhere it will be unnecessary to procure special laws against political terrorists. They will disappear so quickly special measures will not be needed. The powerful Catholic parties—the Centre and the Bavarian People's party—made their first attack on the Hitler government today by declaring President Paul von Hindenburg acted on false information when he dissolved the Reichstag earlier this week.

When the dissolution was proclaimed it was explained Chancellor Hitler had been unable to obtain majority support in the legislature. Tolerance by the Catholic parties would have made dissolution unnecessary.

A government spokesman said that at present the cabinet was planning no special decree against terrorism and had no intention of re-instituting the special speed courts to try terroristic offences which operated under the chancellorship of Franz von Papen. Only if the parties of the left forced the government by provocative acts would extraordinary measures be resorted to, the spokesman said.

Political interest momentarily shifted from the new chancellor to the Prussian diet which will meet tomorrow to vote on the question of dissolution.

Wrecked By Bomb

B.C. Relief Camp Is Scene Of Explosion

Victoria, B.C.—A call to Vancouver on business probably saved the life of W. Rickard, accountant at the Wood Bay relief camp, when the administration building was wrecked by a bomb explosion this week. The sticks of dynamite used in a crude bomb were laid under Rickard's bunk at the camp and later exploded with terrific force, stunning R. C. Keane, camp superintendent, who was asleep in another part of the building.

A Clever Counterfeit

Toronto, Ont.—Said to be a masterpiece of counterfeit art, police are attempting to trace the origin of a bogus \$20 United States banknote, detected by the teller of Kirkland Lake bank.

BOYS HAVE "JAMBOREE"

Forty happy Boy Scouts, a big pot
of boiling beans, a huge pile of sand-
wiches, besides pies and cakes, was
the layout which greeted the eyes of
the wandering reporter last Wednes-
day night in St. Alban's hall, where
Reggie Jones, assistant scout master,
was trying to maintain a semblance of
order. The boys featured their week-
ly meeting by a "Blow-out," as they
termed it. It certainly was!

THE DOLE IN AUSTRALIA

Many of those now-registered as
unemployed are idlers who picked up
a living somehow before the depres-
sion. What has been a tragedy to
thousands of honest, hard-working
men has been a boon to them. They
have subsisted by the same device
methods as before and have enjoyed
the dole as pocket-money. When the
acid test of doing a little work in re-
turn for the community's generosity
to them has been applied their true
metal has been revealed. They have
formed the nucleus of the truculent
army which has demanded the right
to have on the public indefinitely—
Melbourne Argus.

Soviet Russia grows still more grim
in its determined fight to make the
farmers obey its heavy demands. Call-
ing for a merciless war on "saboteurs"
in the North Caucasus, where whole-
sale exiles have taken place, it an-
nounces new penalties for those who
oppose or interfere with its planting
and harvesting plans. Joseph V. Sta-
lin and V. M. Molotov warn all offi-
cials to apply the new laws without
favor. They decree capital punish-
ment for any reluctant farmer—Chris-
tian Science Monitor.

SECOND ANNUAL ANNIVERSARY—"BURNS NIGHT"
COLEMAN CALEDONIAN SOCIETY
FRIDAY, JANUARY 27, 1933.

The second annual observance of "Burns' Night" by Cole-
man Caledonian Caledonian Society was an even greater suc-
cess than that of last year. All Pass towns were represented
and several people were unable to gain admittance to the
Knights of Pythias hall, where the banquet and following
program was held.

AN ANSWER TO FAIR PLAY

The balance sheet of the School Dis-
trict is public property—when pub-
lished.

The coal companies do not need
"Fair Play" to protect them. Surely
they have sufficient on their staff for
their requirements.

The school board the last two years
paid fifty cents an hour or more for
labor engaged by the board.

We are not responsible for con-
tractors, but do use our influence to
pay proper wages. In this respect
we've had no complaint.

"Fair Play" states janitors get more
wages than the secretary of the town
and school combined. My answer is
this:

Janitors work eighteen hours, the
secretary eight hours. You think it's
fair play to cut the salary of the
man who does the most work—"kinda
kick the under dog."

About teachers' engaged: If you
have any complaint to make of them,
why don't you state so in the open—
don't strike in the dark. Act what
you preach as a lover of "fair play."

F. BARRINGHAM.

COLEMAN

ALBERTA

**Sir Thomas Horder, distinguished Phy-
sician of London, England, has stated:—**

"The willing and happy worker will get more
work done and do it better than the unwilling
and discontented worker. It is in this direction
that alcoholic beverages like beer make their
great contribution to economic efficiency.

"Appetite is a function of the brain as much
or even more than of the stomach, and its im-
portance in the physiology of digestion and
nutrition is very great. It is stimulated by a
moderate use of such a beverage as beer, and
at the same time zest is given to life which
results in larger and richer activities."

Great Drive Of Reindeer From Alaska To Canada To End Early This Spring

In March or April of this year the great drive of reindeer from Alaska to Canada's North West Territories is expected to be completed with the placing of the herd on the winter grazing range to the east of the delta of the Mackenzie River and the work of building up a new source of supply of food and clothing for the Dominion's northern natives will be begun. Department of the Interior representatives will take delivery of the herd from the men who have conducted the movement across the thousands of miles of Arctic terrain.

The most recent advice of the herd was contained in a wireless report received by the Dominion Lands Administration of the Department of the Interior to the effect that contact with the herd of approximately 2,300 animals had been effected at Icy Reef, Alaska, about twenty miles west of Demarcation Point, which is the point where the boundary between Alaska and the Yukon Territory of Canada reaches the Arctic Ocean. A party from the Canadian reindeer station had been sent out on November 22 for the purpose of getting in touch with the drive and to accompany it in the crossing of the Mackenzie. On December 4 they had effected the "contact" and joined them in charge of the movement.

Preparations for the reception of the herd were completed early this winter and the stations on both the summer grazing grounds along the coast near Kittigazuit east of the mouth of the Mackenzie and on the winter range which lies inland along the east branch of the Mackenzie River are ready for the arrival of the reindeer. Mr. A. E. Forsell, of the Dominion Lands Administration of the Department of the Interior, is in charge of the reindeer camps, and his staff includes three Lapp families.

The winter station is the larger of the two and in many ways the more important as the herd will be a greater part of the year on the grazing grounds in its vicinity than at Kittigazuit station. The buildings are erected on a fairly level plain about one-quarter of a mile, wide from which the Caribou Hills rise to an elevation of about 500 feet. The plain was at one time densely timbered, but the forest was destroyed by fire about half a century ago and the new growth consists mostly of cane birch and spruce. On a high plateau to the east of the station there are no trees but it carries a splendid cover of reindeer moss. This area and that adjoining the upper Ekimio lakes to the north and east constitute the principal winter range. This station is about fifty miles by water trail from Akkavik, and seventy miles by water, while the distance between the winter and summer camps is sixty miles by winter trail and seventy miles by water. The buildings at the winter station include a frame house which is occupied by the officer in charge; three log huts for herders; a log building as additional sleeping quarters; two warehouses; and a workshop. The station is also equipped with a power boat for patrolling during open navigation.

The summer station near Kittigazuit has four buildings, one of which is a frame dwelling and the other three are of log construction. One mile to the north is the main corral, the largest unit of which is 400 feet in diameter. The more northerly grazing area, which is located along the coast to avoid the fly pests in the summer, is well watered and altogether the location of the combined ranges is considered very satisfactory for the first stage of the work of introducing reindeer into the Canadian North.

Trade With Russia

Only Possible When Country Pursues Methods Of Civilization

In an interview with a representative of the Star, E. W. Beatty, president of the C.P.R., said that Russia will be back in world trade. "What conditions will forward that consummation?" the reporter asked. "Upon this—it must be clearly understood as to whose rules will prevail. Nothing avails to keep Russia on the outside except this: that she shall adopt and pursue the methods of civilization. If there are adequate tokens of that, Russia, of course, is to be welcomed back into the family of nations."

Unemployment is small in Trinidad, and is expected to decrease shortly.

Englishwomen Resist Contention Of Judge

Believe Themselves As Competent As Men On Difficult Jury Cases

Are women jurors intelligent enough to hear complicated lawsuits involving big business?

Lord Justice Thomas Edward Scrutton, 76 years old, and one of his Britannic majesty's lords of appeal in London, England, started a free-for-all controversy when he virtually answered this question in the negative in the course of a judgment.

Dismissing the appeals of six men against the findings of a lower court, in which the plaintiff company had been awarded damages totalling two and a quarter million dollars, his lordship praised the jury for their handling of the evidence in a tangled case lasting in all 24 days.

He then made the remark which has set Englishwomen by the ears. "There was no woman on the jury," Justice Scrutton said, adding, "and that is an advantage where heavy business transactions have to be considered. The documents this jury of men asked for were very material documents, and the jury showed very great intelligence in grasping the business problems presented to them."

Leading feminists immediately attacked this remark tooth and nail, declaring that as long as Englishwomen have been given the right to sit on juries, they should be considered competent enough to hear any case, however difficult.

Against this contention prominent lawyers have stated it is better that all-male juries should hear cases in which everyday business is involved, pointing out that men are quicker at grasping business problems.

But the women have not had their last word yet, and there are indications that a movement will be launched to enforce equal rights for jurywomen.

Alberta Sugar Beet Crop

Sugar Produced Expected To Total 45,000,000 Pounds

Final estimates on Alberta's sugar beet crop for the past season, given by the Raymond sugar factory, show that 150,000 tons of beets were harvested over the contracted acreage, and the sugar run will total 45,000,000 pounds. The beet growers of southern Alberta this year passed the 10-ton per acre average for the total acreage under contract. In one district the average reached almost 12 tons, while some individual crops ran 15 to 20 tons. The season yielded the heaviest crop yet known in the province. With increased capacity installed last fall, the factory at Raymond produced 45,000,000 bags of sugar this season, or about six times the amount turned out in 1925.

Bargain For Some One

Walter Lund, 26, Winnipeg freeman, seeks to end his personal depression by getting married. Any woman who will pay his \$500 hospital bill, provide him with a good home and pay for a full course of guitar lessons can have him for husband, he has announced.

Knocked down by a locomotive, G. A. Felgar, 45, of Brighton, England, lived for two days with a broken spine.

SMILING STARS AT PREMIERE

Two of movie-drama's leading lights, Douglas Fairbanks, Jr., and his wife, the talented Joan Crawford, are shown as they arrived at a Hollywood theatre for the premiere of a new picture recently. The smiles that are displayed by the popular couple here seem to give the lie to rumors that have circulated lately that all is not well in the Fairbanks household.

Shoots Elk In Alberta

Veteran Sportsman Proudly Displaying Handsome Set Of Antlers

One of the first hunters to bring down an elk in northern Alberta since the ban on shooting of these animals was removed in certain parts of the province, George Fink, veteran sportsman of Falun, is proudly displaying a handsome 13-point set of antlers.

The animal was shot by Mr. Fink in the Brazeau district about 70 miles north-west of Edmonton, where the Brazeau River joins the Saskatchewan.

The particular elk that fell to Mr. Fink was one of three feeding at a rancher's haystack close to the Saskatchewan River.

The antlers measure 56 inches from tip to tip and as equal distance from the base of the head to the tip of the longest antler. This is a fairly large set, according to Mr. Fink.

Some years ago Mr. Fink shot a deer that veteran hunters declared was the third largest ever shot in the province.

On another occasion he aroused much interest by shooting an albino woodpecker.

Elk are extremely plentiful in the Brazeau district the hunter states.

Proud Of Health Record

Common Diseases In Alberta

Last Year Lowest On Record

General health conditions in Alberta during the past year were the best on record, so far as communicable diseases were concerned. The provincial department of health sums up the year as in this respect remarkable, establishing a new high mark for freedom from such diseases.

Notwithstanding economic conditions, which might naturally be expected to aggravate ill-health, there was a marked improvement in 1932 over any previous year.

The death rate for the year will fall somewhat below that of the previous year, which was 7.2 deaths per 1,000 population. Infant mortality in 1932 made a considerable and highly satisfactory drop, being only 58 deaths of children under one year of age, out of 1,000 births, as against 67 the year before.

Other figures that, along with the death rate of infants, were regarded as particularly significant of the general health situation are those showing the maternal mortality rate. This was 3.8 per 1,000 living births, the lowest since the department has been keeping records.

How To Make Time

People Who Do Not Idle On Job

Accomplish Much

People who get through an immense amount of work are always those who know that idling must not be allowed to put forth a covetous hand and steal five minutes here and half an hour there. They can obtain a succession of successful results of application, as a good farmer can obtain the most from his land by a program of rotation of crops. It is often found that the busiest folk are those who can find time to do a kind act to a friend or neighbor, for they know how to fit in one thing with another, till they are actually said to be able to "make" time when wanted.

Marked Increase In The Number Of Inhabited Farms In Saskatchewan Is Noted

A Fisherman's Paradise

New Map Of Part Of The Muskoka Lakes Region

Persons familiar with lakes Simcoe and Couchiching and the western portion of the Trent Waterway will welcome the publication of the new Orillia map sheet by the Topographical Survey, Department of the Interior, at Ottawa. This map adjoins the Muskoka sheet which lies immediately north of it. These two maps, together with the Hurary Sound and Byng Inlet sheets already published, and the Sundridge sheet which is expected at an early date, include a part of Ontario famed far and wide for the facilities which it offers for sport and recreation. These maps are produced in co-operation with and from joint surveys with the Department of Survey, Province of Ontario.

The Orillia sheet borders Georgian Bay, one arm of which extends into it and forms several excellent deep-water harbours. These ports have railway connections with Toronto and Montreal and there is a considerable freight movement to and from the upper lakes. The Trent Waterway has its northern terminus at Port Severn shown on the map. This water route is approximately 250 miles in length extending from Georgian Bay to Trenton on the Bay of Quinte on Lake Ontario. It is a series of navigable lakes and rivers connected by short stretches of canal and provided with the necessary locks and dams to enable vessels to cross the watershed. It follows the old Indian route between Lakes Huron and Ontario. The first white men to traverse it were Champlain and a few followers who, returning from Georgian Bay in 1615, accomplished a large party of Huron Indians to Lake Ontario. The connecting links were built by the Dominion Government and the waterway is operated by the Department of Railways and Canals without fees or tolls to the other passes through some of the finest scenery in Ontario. The country is noted as a "fisherman's paradise." It affords unexcelled opportunities for boating, fishing, hunting, rest, all under the spell of the most healthful and invigorating surroundings. A few hours travel on standard equipped trains or over improved Provincial highways reaches many of its beauty spots while a day or two serves to penetrate the wilds. Generous hunting and fishing privileges are available to tourists. Excellent accommodation at perfectly appointed hostries, summer hotels, camps, and cabins is available at reasonable rates. Lakes Simcoe and Couchiching, with their many fine beaches and Lake Muskoka with its gem-like islands are favourite summering places for the families of business and professional men from Ontario and adjacent United States cities. The particularly healthful surroundings have led to the establishment of several sanatoria.

One Of Perishable Foods

Eggs Should Be Kept In Clean Cool Place

Eggs belong to the same food class as meat or milk. They are almost as perishable. Just because they are enclosed in a hard shell, they get rougher treatment. The egg shell is porous. Dirt and filth and mold and disease germs can pass through and spoil an egg. The water of the egg shell evaporates through the egg shell almost as fast as if it were in an open pan.

Many a housewife allows eggs to grow stale on a warm pantry shelf or to take in the odors of a foul ice-box and then blames the farmer or grocer for selling bad eggs.

It costs almost as much to produce a bad egg as to produce a good egg. Most egg losses are, actually, preventable.

A Lucky Escape

One night a man in a car was run down at the level crossing. Consequently the old signalman in charge had to appear in court. After a charged cross-examination he was still unshaken. He said he waved his lantern frantically, but all to no avail.

The following day the superintendent of the line called him into his office.

"You did wonderfully well yesterday, Tom," he said. "I was afraid at first that you might waver."

"No, sir," replied Tom, "not as long as that lawyer didn't ask me whether my lantern was lit."

Better Grade Barley

Production Is Being Sadly Neglected By Canadian Farmers

Production of good barley is being sadly neglected by western Canadian farmers, particularly in Saskatchewan, although there is always a healthy domestic market for a malted barley, said George Bailey, of Winnipeg, manager of the Canada Malt Company.

The subject was discussed at Saskatoon between Mr. Bailey, J. A. Blair, manager of the Regina Brewing Company, and G. M. (Monty) Elsch, president of Black and Armstrong, Winnipeg, and president of the Western Breweries, Ltd.

"Why not have a reputation for good barley as well as for good wheat?" Mr. Bailey argued. About 60,000,000 bushels of barley were produced in Canada last year, but much of it was poor, good only for feed.

Gilders Use Mountain Top

Flying from the top of Knocknag Mountain, above Greensland, Ireland, has become a favourite sport of members of the Ulster Gliding and Aviation Club. On the mountain top is an extensive, but rough tract of waste land, and from this the gliders have started long flights. Attempts to break height and endurance flights are being made.

A stoking 80 feet long hung from the roof of Albert Hall, in London, England, during a Christmas sale.

EXCESS FAT MELTS

Under Treatment that Creates Energy

Some folks are naturally fat, but there's a lot of people who put on pounds of unhealthful fat because they haven't got enough energy to move about to keep it off.

It's not laziness in most cases—but a condition brought about by sluggishness of the internal organs—the liver, bowels, and kidneys. As a result, poisons and harmful acids that kill vigor, ambition, and energy get into the blood—the whole general tone of the body is lowered and fat accumulates.

Thousands of overworked men and women find in Kruschen Salts, a perfectly safe, sure, and beneficial means of reducing.

The "little daily dose" of Kruschen Salts keeps the organs functioning properly every day, and fills you with such a feeling of radiant vitality and vigor that before you know it you are fairly "jumping out of your skin" with energy, instead of moping around with reduction following a matter of course—Nature attends to that.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We may make many special "GIANT" packages which make it easy for you to prove the value of Kruschen.

Ask your druggist for the new "GIANT" 70¢. This contains of our regular 70¢ bottle together with a separate trial bottle for about one week. Open the trial bottle first, put in the salt, and use it for one week. If you like it, the regular bottle is still good as new. Take it back. Your druggist is authorized to return your 70¢ bottle, immediately and without question. You have tried Kruschen free at our expense. That could be fairly good, couldn't it?

Kruschen Salts, Ltd., Manchester, Eng. (In Canada, U.S.A., Importers, McMillan Bros. Ltd., Toronto.)

WORLD HAPPENINGS BRIEFLY TOLD

The ages of 128 old people entertained to a tea and concert by the Rotary Club of Barking (Essex) and the Wesley Guild totalled 9,029 years.

Professor Auguste Piccard said that men may fly to other planets in rocket "planes" in the future but they will not be able to come back.

John Galsworthy, British novelist and dramatist and 1932 Nobel prize winner, died January 31. He was 65 years old.

Building societies in England have advanced an average of \$255,000,000 a year in the last three years to home builders.

Further cuts in federal appropriations for agriculture are believed inevitable in the estimates for the fiscal year beginning April 1 next.

Increased tariffs on imports to Britain has placed in a precarious condition the hand-weaving industry, started by the Free State Government in South Dongail five years ago.

Curtalement of war debts owed the United States has been approved by member organizations of the Chamber of Commerce of the United States.

Possible use of the X-ray to bring down aeroplanes was described to a group of scientists by Dr. J. W. M. Dumond, research fellow at the California Institute of Technology, Los Angeles.

The Italian Government accepted the offer of the United States Government for a discussion of the war debt as soon as possible after Franklin D. Roosevelt takes office as U.S. President.

Hon. Vincent Massey, former Canadian Minister to the United States, told the Central Ontario Liberal Association executive at Cobourg, Ont., that if the Liberal party succeeded in gaining power, the first step taken "would be to drop the tariff."

Japan's Exports Higher

Shipments of Cotton Material and Silk Improve Trade

Japan's shipments of silk, of rayon (65 million pounds in 1932) and of cotton materials are said by the Commercial Intelligence Journal to account for an improvement in her export trade. For the first time she has exported more cotton cloth than Great Britain, the figures for the first ten months of 1932 being: Japan, 1,842,217,000 yards; Britain, 1,620,248,000 yards. She sold more of this material to India than India's British overlord did.—Toronto Weekly Star.

Peru has placed a tax on ice.

YOUR LIVER'S MAKING YOU FEEL OUT OF SORTS

Wake up your Liver Bile

—No Calomel needed

When you feel blue, depressed, sour on the world, that's your liver which isn't pouring the daily two pounds of liquid bile into your bowels. Digestion and elimination are being slowed up, food is accumulating and decaying inside you and making you feel wretched. More bowel-movements like salts, oil, mineral water, laxative candy, or senna, give no relief. You don't get far enough. *Clyster's Liver Pile* is the best one safe. Purely vegetable. Burn. Ask for them by name. No substitutes. 25c. at all druggists.

Announces New Find

Director Of Museum Believes He Has Discovered Tower Of Babel

What is believed to be the Ziggurat, or the "Tower of Babel," in the ancient city of Akkad, has recently been discovered by Dr. Leroy Waterman, director of the University of Michigan-Cleveland Museum archaeological excavations in Mesopotamia. The find is a mound about 50 feet high and 250 to 300 feet in diameter. The outer structure is a circular wall of sun-dried bricks, 30 feet thick and 15 to 20 feet high. Above the level of the wall are alternate layers of reeds and earth. The north side of the mound is a solid structure of unburned bricks.

Inscriptions in the mound appear to confirm the early origin of the structure, which dates back to about 4,000 B.C.

The Tower of Babel, according to legend of the Book of Genesis, was built by inhabitants of Babel with the intention of climbing to heaven. They were, however prevented through their speech being confounded.

Always Foots the Bill

No Call For Funds Ever Appals British Taxpayers

John Bull is used to paying. He has been paying ever since the war, and has become hardened to standing treat to the nations. The pleasing conviction prevalent abroad that whatever happens John Bull will foot the bill, so sedulously fostered by successive British Governments, is as strong as ever. Even the staggering prospect of handing over colossal sums to the U.S.A. while getting not a penny from our own debtors does not appal the British taxpayer. Nothing appals him any more. He knows from long experience that he is "for it" in any case.—London Truth.

By Ruth Rogers

DELIGHTFUL FOR SCHOOLGIRLS IS THIS CHARMING MODEL WITH PUFFED SLEEVES

It has such a pretty neckline. The snug hips give it smart sophistication the growing girl adores. At the center-front, there is an inverted plait to give the skirt ample fullness and still retain its slim line. The original dress was carried out in dark hyacinth-blue wool crepe, the collar being of light hyacinth-blue crepe. Note how the collar terminates in a jabot.

The pattern also provides for long sleeves as in small back view. Puffed woollens, wool jersey, wool challis and tweed-like cottons are sturdy smart ideas.

For more "simpler best" make it of rough crepe silk in granum red or of brown velveteen.

Style No. 954 is designed for sizes 8, 10, 12 and 14 years.

Size 8 requires 1 1/2 yards 36-inch with 1/2 yard 36-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

PRINCESSES ON A SAND PILE

These charming little ladies playing on the sand pile are Princess Elizabeth Alexandra Mary (left), and her sister, Princess Margaret Rose, children of the Duke and Duchess of York and grandchildren of the King and Queen. When this photograph was taken they were playing with spades and buckets at the estate of their maternal grandparents, the Earl and Countess of Strathmore, in Hertfordshire.

Report Is Denied

Japan Says No Naval Base Is Being Established In The Pacific

The report of the mandates commission, presented to the League of Nations Council, in referring to rumors that Japan was establishing a naval base in Pacific island under Japanese mandate, expressed satisfaction with the Japanese government's denial.

"The report is unfounded," the Japanese government is reported to have replied to the commission's inquiry. "The government has not contemplated the establishment of a naval base in the islands under mandate."

Looks Like Complete Failure

Hopes Of People For Substantial Disarmament Not Realized

The end of the Conference's activities may be complete failure. In any case substantial disarmament is in a case when the need for disarmament was never more clamant. It is a tragic anti-climax to a Conference which, assembling a year ago after ten years of technical preparation, roused the hopes of all the peoples of the world for the stabilization of peace and relief from the financial burden of armaments.—Glasgow Herald.

Vancouver's 1932 traffic death toll of thirty-eight compares favorably with that of the previous year, during which forty-four met death.

Sixth Sense For Ships

New Safety Device Will Prevent Collision In Fog

Not even a rowing boat can hide in the fog from a new safety device which will guard ships from collision at sea. The device emits an eerie, high-pitched whistle, which reaches so distinctly to the sending boat that it's pilot is said to be able to locate it in any direction from one-sixth to half a mile away.

It is claimed that the device has been tested in a small rowing boat with two occupants 800 feet away. A sailing boat was spotted at 1,350 feet, a 528-ton steamship was located in thick fog at distances of 1,360 feet to 2,160 feet.

The apparatus consists of three large megaphones. One sounds the automatic whistle; the other two are "ears." Sounds from either side reach one "ear," a tiny fraction ahead of the other. Sounds dead ahead or astern arrive simultaneously.

A Profitable Occupation

Hollanders Find Valuable Articles Tourists Lose On Beaches

Combining the beaches is a profitable occupation for thrifty Hollanders. When the tourists all go home from the seas each year they stake out claims and work patiently for weeks. They go over the same patch of sand again and again, allowing for the influence of wind and waves. Some of the "miners" make considerable hauls, consisting of coins, gold and platinum, jewellery and other articles of value.

+ Do You Know? +

That in Stanley Park, Vancouver, British Columbia, this beautiful monument immortalizes Pauline Johnson, Canada's only Indian poetess? The rock upon which her features have been engraved is one from which she used to gaze out over the Pacific Ocean while she was composing some of her famous poems. At her request her ashes were distributed over the waters of the sea close to the foot of this rock.

SUNDAY SCHOOL LESSON

FEBRUARY 12

JESUS TEACHING BY PARABLES—FOUR KINDS OF HEARERS

Golden Text: "Herein is My Father glorified, that ye bear much fruit; and so shall ye be my disciples."—John 15:8.

Lesson: Mark 4:1-20.

Devotional Reading: Psalm 119:9-16.

Explanations and Comments

The Scene, verses 1, 2.—Last week's text told of the preparation Jesus took to have a boat in readiness in case it became necessary for Him to escape from the crowds that thronged Him. Now Mark tells of such an occasion. Jesus began His teaching sitting on the lake shore (Matthew 13:1), but took refuge in a boat as a great crowd bore down upon Him. From a safe distance off in the lake Jesus spoke a series of parables to the crowd that stood on the sloping beach facing Him. "He sits by the seaside fishing and netting those on the land," is Christendom's word picture of the scene.

The Parable Of The Sower, verses 3-9.—Very clear is the parable itself. Some of the seed sown fell upon the hard-rodden wayside and could not enter the ground; it was devoured by the birds. Some seed fell on rocky ground where the soil was shallow. The rocks crop up everywhere in Palestine, and the hills sloping down to the lake have only a thin covering of soil. Seed there germinates quickly, being so near the warm sun surface, but the roots of the plant which quickly springs up cannot stretch down deep, and it is soon withered by the sun. Some seed fell upon soil largely sown with thorns which choked the plants as they grew. And some fell upon soil so good that it yielded thirtyfold, sixtyfold, and even a hundredfold. This hundredfold yield is the seed of the Kingdom of God. The explanation of the parable, but it was well within the harvest of the fertile Esdraelon Valley.

Reasons For The Use Of Parables, verses 10-12.—When the crowd had dispersed, the disciples and other close followers of Jesus asked Him for an explanation of the parable just given. Jesus told them that they could understand in part the mystery of the Kingdom of God—the deep truths of the Gospel—but others could not, and therefore He uttered those truths by means of parables, illustrative similes.

The Explanation Of The Parable, verses 13-20.—Jesus began His interpretation of the parable with a gentle rebuke. If they could not understand those things how could they expect to understand other parables? The Sower sows the word of God to the hearts of men. Like the four kinds of soil are four kinds of hearers; those whose hearts are so hardened that they are indifferent to the message; those who gladly give the word a hearing, but whose interest is short-lived; those who hold forth the promise of bearing fruit, but allow other interests to choke their Christian life; and those who endure to the end and bring forth thirty, sixty, and even a hundredfold.

These are they by the wayside, where the word is sown. "The hearers are identified with the seed, and not, as we might expect, with the soil. The hearer of the gospel is at once plant and seed."—H. B. Swete.

"Cares, riches, fleshly desires—these are the deadly trio of World-chokers. As these surge into man's life they suffocate it. It becomes like the snowily lily standing in its spotless whiteness until the weeds and thorns creep in about its roots, and then it bows, and droops, and withers under the deadly choking of its foes. If the curtain could be lifted from the lives of thousands of busy, feverish Christian men immersed in these things, they would be seen gasping for spiritual breath, throttled by the clutch of these spiritual foes."—James H. McConkey.

Backing Barter Scheme

Hungarian Banks Have Established Joint Office To Co-Operate

Six important Hungarian banks decided to co-operate in order to promote the exchange of goods by barter, according to word received by the Montreal Board of Trade. The banks have established a joint office in Budapest for this purpose.

The scheme is being backed by the Hungarian government and participation in the plan by the British and Hungarian banks indicates, it is claimed, Great Britain's determination to foster the Hungarian market for United Kingdom and British export products.

A correspondent says he would like to know the exact number of people in this country who don't play bridge. To start him off, we'll give him the name of the gentleman who was our partner the other night.

Congress has revised the tariff 22 times.

New Machine Demonstrated

Inventor Claims His Machine Will Double Own Horse-Power

Aeroplanes that can fly as fast as their parts are kept in repair, liners that can cross the Atlantic needing nothing but a little oil in their machinery, trains that can travel up and down Canada without coal, manufacturing plants self-contained so that they require no hydro service, practically unlimited power and heat in the home for nothing but a new industrial revolution, in short, is promised through the invention of a machine by J. M. Mitchell, of Grimsby, providing the machine does everything he says it will do, when it is tested and re-tested.

"I have applied for patents," Mr. Mitchell said, "I am covered in every country in the international patent agreement. I told my patent agent that I would double his fees if he could show me where I am wrong, but he couldn't.

"I took my idea to Toronto University, and they could not find a flaw in my theory. They worked hard to find a fallacy, but they couldn't do it.

"But the proof of the pudding is in the eating. I have made a machine that doubles the horse-power that is applied to it. That's complete answer to the sceptics. Incredible—but it works."

A demonstration of the ability of the machine to perform what its inventor claims was given for newspaper reporters here, a small model had been set up fitted with a tiny motor. The motor was a little device and certain weights are raised at a specified speed. When the Mitchell appliance was applied to the apparatus, the same motor apparently lifted larger weights without loss of speed or lifting.

Recipes For This Week

(By Betty Barclay)

SWEET CROQUETTES

- 1 cup stale cake crumbs.
- 1/4 cup chopped, blanched almonds or shredded coconut.
- Grated rind 1/2 lemon.
- 1/2 tablespoon lemon juice.
- 1/2 cup orange juice.
- 1 egg yolk.
- 1 egg white.
- Fine cake crumbs.

Mix first four ingredients in saucepan, add orange juice, to moisten, and let stand ten minutes. Heat to boiling point; remove from fire; add egg yolk, and cool. Shape as croquettes, dip in egg white, beaten slightly, with one tablespoon cold water; roll in sifted dry bread or cake crumbs, and fry in deep fat. Sprinkle with powdered sugar, and serve with chocolate sauce.

FIVE O'CLOCK TEA RUSKS

- 2 1/4 cups special cake flour, sifted.
- 4 teaspoons baking powder.
- 1/2 teaspoon salt.
- 1/2 teaspoon cinnamon.
- 1/4 teaspoon nutmeg.
- 2 tablespoons brown sugar.
- 2 tablespoons butter or other shortening.
- 1 egg, well beaten.
- 1 egg milk or water (about).

Sift flour once, measure, add baking powder, salt, spices, and brown sugar, and sift together three times. Cut in shortening. Combine egg and liquid. Add liquid gradually until soft dough is formed. Turn on floured board. Cut in 1-inch pieces. Shape into balls. Place together in well-greased shallow pan. Brush with milk, sprinkle with additional brown sugar. Bake in moderate oven (375 degrees Fahrenheit) 15 to 20 minutes. Makes 2 dozen small rusks.

Three hundred children of British soldiers from foreign stations had their first glimpse of England when their fathers arrived home at Southampton recently.

A rainfall of one inch is equal to 100 tons of water to the acre. It takes a snowfall of about twelve inches to equal one inch of rain.

New Fog Signal

Canadian Invention May Replace Lighthouse Sirens

An inventive Canadian official applying the recently developments in sound recording and amplification to the uses of navigation, has produced a new fog signal which is to be installed experimentally in the Partridge Island Light, at the entrance to St. John's Harbor, in the Bay of Fundy, where it will replace an existing fog diaphone, or siren. With the new installation, instead of the fog siren's familiar wail and bell, the mariner feeling for the entrance in thick weather will hear a giant voice intoning "Partridge Island! Partridge Island!" at whatever interval the Dominion commissioners may appoint. It is hoped that he will hear it, at any rate; for the acoustics of the fog are tricky things, about which one can never be sure until one tries, and not always then. If the experiment succeeds, however, one may expect to see it imitated. The principal method now by which one fog signal is differentiated from another is by the timing of the blasts; it is easy to make mistakes under this system, and mistakes of that kind are likely to be first announced by the grinding of one's keel upon the rocks.

So it will no doubt be helpful to the coasting skipper when the light-house, as the fog drifts in, begins to cry their own name in enormous mechanical voices instead of simply announcing their presence in the mournful roars they use today. It will be just another step in the modernization of the sea, a new advance in the progress that began with conch shells and bell buoys, and has already produced the submarine bell signal, the fathometer and the light beacon. The present fog sirens indeed, are quite recent inventions, and perhaps one should not be sentimental about them. Still, they seem to have the salt time of the sea in their broken throats, and the mere recollection of their long-drawn-out bell-wail is enough to conjure up a whole vision of a damp foreshore, the dull heave of the groundswell upon the rolling rocks and the dripping fog rolling in to wrap the sea in mystery out of which the distant voices of other lights monotonously reply to the ear-splitting howl of the signal near by.

There is a fascination in the voices of the fog, from the solemn if friendly bell buoy to the shrill, forever wailing out its unfathomable melancholy upon outer shore. When the lighthouses begin to speak their names, will they be as impressive? Perhaps so. At any rate, it should make an eerie chorus along a well-lighted coast until the day when all that is done away with and navigation is reduced completely to a matter of radio waves, remote control and photo-electric "eyes."—New York Herald-Tribune.

RELIEVES COLDS WITHOUT "DOSING"

W. N. 11 1928

How "Anzac" Originated

Used By Field Marshal in Cable During War

General Sir Ian Hamilton, in an introduction to "Bud the Monkey," by Major MacDonald, tells of the addition of two important new words to the English language; it says:—
"The reason why the Anzac afterwards became so famed as the 'digger' was simply because he d.d. 'dig' in a way, and with a result that no other soldier of any army could touch. The first direct order from their Commander-in-Chief to the Anzacs was that sent at 12.5 a.m. on April 28, 1915. This was the order sent personally by Hamilton to Birdwood: 'You have got to dig the difficult business; now you have only got to dig, dig, dig until you are seasick.' So the Anzacs became 'diggers'." . . . The chief distinction of an Anzac is that he was the first, the biggest, and the finest of all war exports of Australia and New Zealand. "Who invented the word 'Anzac,' which will go booming down the ages?" The answer is given by Field Marshal Sir William Birdwood and General Sir Ian Hamilton. The Field Marshal was the first in the alphabetical game, using the word in cables and telegrams before the General ever appeared on the scene; but the General was the first to write it boldly, without apology or explanation, over and over again, in an official despatch to that most terribly correct and strictly regulation body, the War Office, thus letting the whole English-speaking world know of the Anzacs."

Work Nearly Completed

Montreal Church Has Most Beautiful Crypt in Work

Reputed to be the most beautiful crypt in the world, the burial vaults for the archbishops, bishops and auxiliary bishops of the archdiocese of Montreal, are nearing completion. Unique in beauty and design, the crypt is being built in the east side of the Basilica of St. James at a cost of \$75,000.

Two strong iron gables will protect the interior of the burial vaults. Beneath a golden dome, a modern indirect lighting system adds to the beauty of the 18 marble covered burial vaults, in five of which already repose deceased bishops and their auxiliaries. One side, including nine vaults, is reserved for the archbishops and bishops, while the other side is intended for auxiliary bishops.

The final work, a huge plaque of Mr. Bourget, first bishop of Montreal, and a power in the disputes between church and state in the Province of Quebec last century, is ready to be moved into place. The bust has arrived at the basilica, but its installation is delayed pending word from the archbishop co-adjutor, Mr. Georges Gauthier, who is at present recovering from an illness in Paris.

The Basilica of St. James, where the vaults have been built, is the Roman Catholic cathedral of Montreal. It is modelled after St. Peter's Rome, being one-quarter the size of the cathedral in the eternal city.

Envelopes Of Olden Times

First One With Gummed Flap Appeared In 1840

In the old days the flap of the envelope was not gummed as it is today, and every letter writer had to have a tiny vial of sealing-wax on hand for fastening even a regular bought envelope. In 1840, however, an envelope with a piece of gum about a half-inch square fastened to the flap was put upon the market, and this proved so popular that the other kind went out of fashion.

When, about 1845, envelope makers began to gum the entire flap there was loud complaint that the gum required too much licking and also had an unpleasant taste. But in 1850 the use of mint in the gum had largely overcome this prejudice, and those who wished to seem up-to-date, especially in business circles, bought the new-fangled envelope. As late, however, as 1850 more than ten out of every hundred letters mailed in Great Britain used the folded last page instead of an envelope, and as late as 1855 such a substitute for the envelope was still exceedingly common in America.

Drenched the Customers

Turning what he believed was a valve control that would fill a water tank on the roof of a department store, in Birmingham, Alabama, an employee brought second-alarm fire equipment to the midtown section and gave many patrons of the store a drenching remedy. He had set off a gadget that controlled a sprinkler and fire alarm system in the store.

Largely a Mystery

Scientists Have More To Learn About Aurora Borealis

It is only within very recent years that any scientific study has been made of the aurora borealis. Today quite a little is definitely known about it. Photographs taken of the aurora simultaneously from several points of view far apart, in northern Norway, have proved that its many-colored streamers do not start upward from the earth's surface (as they seem to do when looked at from southern latitudes), but from an elevation of about sixty miles.

On occasions these wonderful streamers of light extend upward the heavens so far southward that they may be seen overhead in the southern states. Such an exceptional display is always accompanied by electrical disturbances which temporarily put the telegraph system out of business. Nor is that surprising, inasmuch as the aurora is wholly an electrical phenomenon. According to the theory now accepted, it is caused by electrified particles discharged from the sun and impinging upon the earth's atmosphere.

The aurora borealis is still to some extent a mystery. Explorers in the far Arctic see its streamers behind them. Corresponding to it at the South Pole, is the aurora australis, which offered to Commander Byrd and his party many amazing spectacles.

No Pupils For School

Children Of Nova Scotia Feast First School Age

Now that North River, King's county, has come to bat with a claim to being Antrim, Halifax county, so far as pupil registration in the public school is concerned, it brings to mind that at Devon, Halifax county, is a school section with a school house and all arrangements for administration but no pupils. The Devon school is about five miles from the Carrs' school in Antrim.

For the past three or four years at least, no pupils have been on the register of this school section. The school building is there all ready to be put into repair should pupils arrive to attend. In the district of Devon are several families residing on farms but all the children have outgrown school age.

The Antrim school was closed for a term because of lack of number of pupils. In 1930-31, two boys were educated under the direction of Miss Rachael Dillman, in her home. These are the same two who now comprise the total enrolment of the Carrs' school at Antrim under the teaching of Mrs. Raymond McMichael. The nearest schools to Carrs' school now in operation are at Wyse's Corner, on what is known as Nuttall Hill, five miles distant, and at Goff's, about ten miles distant. All through this section of Halifax county are deserted farms, relics of a once prosperous countryside.

Did Not Get Treedy

After four months of negotiations for a new trade treaty between Canada and France, C. A. Cahan, Canadian secretary of state, rallied with Mrs. Cahan on his return to Canada. It was indicated Mr. Cahan's efforts had not borne immediate fruit.

Textile mills of France are adding more workers.

HELP FOR TIRED WIVES

Take Lydia E. Pinkham's Vegetable Compound

Wives get tired during the hard times. They are the ones who must bear the burden of the household. The husband comes home with less money in his pocket. It is the wife who must struggle along and make the best of things.

If you are tired, worn out, nervous, try Lydia E. Pinkham's Vegetable Compound. What you need is tonic that will give you the strength to carry 98 out of every 100 women who report to us that they are benefited by this medicine. Buy a bottle from your druggist today . . . and watch the results.

Panama Hats

Skilful Weavers Fashion Headgear From Leaves Of Palm Trees

Panama hats, which have earned a deserved celebrity under the name, are rarely manufactured in Panama, but are made in the neighboring fields of South America. The original hats came from Ecuador, which is still the chief source of production. The name originated during the gold rush to California in 1849. Prospectors purchased these straw hats in Panama and are naturally called Panama hats. Hats made from toquilla straw are now made in Colombia, Peru and in Central America, and all of them are indiscriminately known as Panama.

Few male tourists leave the Canal Zone without one or more of these hats. Shop makers a specialty of catering to the winter visitor. Considerable business in this line is expected to be produced by the six "Mauritania" West Indies cruises, which will land more than three thousand tourists during January, February and March.

The Panama hat is made from the leaf of the toquilla palm. The tree is now cultivated for commercial purposes in Ecuador, Colombia and Northern Peru. It becomes full-grown at eighteen months and lives for forty years or more. The straw are made from the green leaves, which are cut off just as they are about to unfold and are split with needles or the flint-geral.

In Ecuador the hats are made in the Province of Manabí, where they are known as "Jipji-Jappa." Here the hat is also made from a fan-shaped palm which grows from six to ten feet high and thrives best in hot and humid regions. After the leaves are cut from the trunk they are stripped of their outer filament, dipped for a few seconds in boiling water, withdrawn for a moment to be again immersed for an instant, taken out and shaken vigorously, hued to dry in the shade, and a day or two later are placed out in the sun to bleach. A little lemon juice added to the hot water bath gives a much whiter straw. A day or two the leaves are dried, woven into a fan-like form, like string, when the straw is ready for weaving.

It was formerly believed that Panama hats were woven under water, which is not strictly true, although the straw must be kept thoroughly moist. For a moment the weaver, women and children make the most skilful weavers, although men sometimes possess adeptness enough to be successful in the art. It takes from one day to a week to weave a hat, according to its fineness.

Although ordinary Panamas sell for two dollars, one made some years ago as a present to the King of England was so finely woven that it could be folded into a package no larger than a man's watch. It required six months to make this hat. It contains the finest straw and the work on it was done only during certain hours of the morning and evening, when the amount of moisture in the air was just right.

Working Under Handicap

Britain's Mercantile Marine Does Not Receive Any Subsidies

Great Britain stands almost alone among the nations in possessing a mercantile marine which is worked on ordinary economic lines, . . . whereas, in every trade in which it is engaged, it has to face the competition of foreign vessels built and sailed by the aid of large Exchequer subsidies supplied by the Governments of the countries whose flag they fly. Unless some change is made the final result is inevitable. Sooner or later the ship-owners of the country handicapped by this system of inequality in the fierce competition for the trade of the world must go to the wall.—London Times.

More Fish Licenses

During 1931 fish production showed a decrease for every Canadian province except Saskatchewan and the Yukon. On December 20, 1932 there had been an increase of domestic fishing licenses to the extent of 348 over the corresponding period of the previous year. This is an indication that the residents of the province are making greater use than hitherto of the fish of our own waters.

Treat For Queen Mary

Britishers were much surprised to learn that Queen Mary had never seen a talking film. This became known when it was announced she will attend her first talkie in March. It will be a British comedy.

Pineapples are about 87 per cent water.

Get Rid of That SORE THROAT!

Any little soreness in the throat grows rapidly worse if neglected. Crush some tablets of Aspirin in some water, and gargle at once. This gives you instant relief, and reduces danger from infection. One good gargle and you can feel safe. If all soreness is not gone promptly, repeat. There's usually a cold with the sore throat, so take two tablets to throw off your cold, headache, stiffness or other cold symptoms. Aspirin relieves neuralgia, neuritis, too. Use it freely; it does not hurt the heart.

ASPIRIN

TRADE-MARK REG. IN CANADA

Vagabond Crow Angers Vancouver Housewives

Once Civilized Bird Is On Back To Nature Rampage

"Lock the windows and bolt the doors" is the cry of Vancouver housewives when "Impudent Oscar," recalcitrant crow, makes a devastating sally upon carefully guarded foodstuffs and valuables.

Oscar, once "civilized," is on a "back-to-nature" rampage. No one cared when "Oscar" began his somewhat humorous raids upon sidewalk grocers, taking peanuts, grapes, pretzels, and ruining pies. But housewives became indignant, when he made off with part of the family wash of several lines.

His forays were more serious still when he hearily took off with several sheets of an important file through a courthouse window. When he dived into the henyard of Mrs. Guy Bennett and ruthlessly attempted to bully a tiny bantam chick, it was the last straw. Since then he has been a fugitive.

THE RHYMING OPTIMIST

By Aline Michaels

STREET SINGERS

The meadow lark lifts up his voice From fields of green and gold, Where, with all earth, he can rejoice As spring's bright scenes unfold.

But these poor choristers must sing Amid the city's din, While winter's darts harass and sting Through garments worn and thin. Dire poverty and pain they know And weariness and cold. Yet singing, singing still they go With hearts that grow not old.

The meadow lark soars up to sing From fields all gold and green; Triumphantly his carols ring Through spring's enchanted scene.

Yet these street singers, like the lark, Let happy voices ring; Some power has put this joyous spark Within them, so they sing.

The Great Dinosaur

Famous Lizard Of Roche Perceé Just Boulder Says Geologist

The famous lizard of Roche Perceé is nothing more than a huge boulder, according to R. J. Lee, superannuated mining inspector and a keen geologist student.

In past years feature writers have appraised over the massive "remains" then rushed to typewriters to pound out columns of words on the great dinosaur that roamed the prairies long before they were born.

Now Mr. Lee brands it all a pipe dream. "It is nothing but an unusual rock formation," he says, adding that his contention is backed by other prominent geologists.

"Your time seems to be divided between the furnace and your son?" "Yes; if I keep my eye on one the other is sure to go out."

The city of Canton, China, will start a trackless trolley system.

Little Helps For This Week

"Tribulation worketh patience, and experience, and hope."—Romans 5:3.

"I waited patiently for the Lord; and He inclined unto me and heard my cry."—Psalm 40:1.

Lord, we have wandered forth through doubt and sorrow, And Thou hast made each step an onward one; And we will ever trust each unknown tomorrow, Thou wilt sustain us till its work is done.

It is possible, when the future is dim still to cling to the conviction of God's merciful purpose towards His creatures, of His parental goodness even in suffering, still to feel the path of duty, though trodden with a heavy heart, leads to peace, still to be true to conscience. In this patient, though uncheered obedience, we become prepared for light. The soul gathers force.—Wm. E. Channing.

Passengers Were Lucky

Pilot Made Perfect Landing On Ice With One Ski

Piloting his heavy "plane" with marvellous skill and daring, Ronald George made an almost perfect landing on one ski on the ice of Chapleau Lake at Chapleau, Ontario. And not until the big plane had bumped to a stop did his seven passengers realize how closely they had come to death.

George took off with a party of mining notables for a trip to the Kenty Gold Mines property at Swayze Lake. A ski struck a piece of cordwood hidden in the snow and broke just as the machine lifted.

With his ear and hand cut by flying glass, George said nothing to his passengers, but appeared to be continuing on his way. Actually, however, he circled over the town, signalling groundmen to stand by for a forced landing.

An American company is blasting the channel of the Canton River in China.

Local News

Margaret and Ethel Dunlop entertained a few of their friends at a theatre party on Saturday evening.

Mrs. James Fraser of Lacombe and baby daughter, are visiting at the home of Mr. and Mrs. Wm. Fraser.

Mrs. J. O. C. McDonald held a very enjoyable bridge party last Friday evening, Mrs. A. F. Short winning the prize.

Blairmore girls basketball team defeated the Adanac girls teams in a match at the opera house on Thursday evening.

Mrs. J. Ford returned on Sunday morning from a visit with her daughter, Mrs. A. L. Watkins, from Edmonton, the latter accompanying her.

Mrs. Dewar entertained a number of friends at her home on Jan. 28th, Mrs. J. O. C. McDonald winning the bridge prize, Mrs. A. F. Short second, and Mrs. McAuley the consolation.

Fifteen years ago last week, C. C. Bremner, of Macleod, present public schools inspector for the Macleod Inspectorate, joined the Royal Flying Corps.—Blairmore Enterprise.

Forest Ranger "Bill" Antle was in from North Fork last week-end. He says by spring the fish will be pretty wild, and already in the open water they have quite a job to keep them within bounds.

Mr. and Mrs. A. M. Lucas of Carstairs announce the engagement of their eldest daughter, Miss Catherine A. Lucas to Mr. Blythe B. Davidson, youngest son of Mr. D. Davidson of Alexo, the wedding to take place early in February.

The weekly bridge party and dance of the Rebekah lodge held on Jan. 28 was well attended, the prize winners being: Richard Jackson and W. Dutil, gent's prizes; Miss Surtees and Mrs. J. Richards, ladies. These socials will continue till further notice, on Saturday evenings.

Minerva Chapter O.E.S. held a very enjoyable bridge party in the lodge rooms on Jan. 26. Mrs. C. W. McKinnon won the ladies' prize; Mrs. A. F. Short second; Mrs. Garner consolation; the gent's prizes were won by Mrs. McCallum and Maurice W. Cooke, "Sonny" Richards being awarded the consolation.

Those who believe in turning over the town for the government to run do not tell people that if it put into effect, which is highly improbable that it means confiscation of property. Those who desire government dictatorship are those who have nothing in the shape of property to be confiscated. Intelligent ratepayers will reject such a proposal.

W. E. Worden again has the contract for storing the ice for the C.P.R. for use on this division. The company has the ice on the Canadian West lake and it is hauled here in box cars and stored in the large ice house in the railway yards here. It requires about 3000 tons of ice to serve throughout the year, and this is approximately the amount that will be handled this season.—Cranbrook Courier.

R. Sudworth on his arrival in Edmonton on Wed., Jan. 31, as a delegate from Coleman to the school trustees convention, was taken ill with pneumonia, and was moved to Misericordia hospital. W. Cole, a delegate from Bellevue, noticing that he had not appeared at the convention, called at Sudworth's hotel and immediately ordered a doctor. He came home on Sunday, in a weakened condition.

ST. ALBAN'S ANNUAL MEETING
St. Alban's annual congregational meeting was held on Jan. 31, various organizations reporting for the year. Church revenue showed a material decrease during 1932. The vestry appointed were Frank H. Graham, rector's warden; H. T. Halliwell, people's warden; W. Borrow, W. Williams, R. F. Barnes, J. M. Rushton, F. G. Creighton, M. Cornett, G. Derbyshire Jr., vestrymen. Mrs. G. Brown kindly volunteered to continue as envelope secretary.
